

BYO iPad Getting Started

The following checklist outlines important tasks to get your iPad ready for the BYO iPad Program. Please ensure the following tasks have been completed prior to bringing your iPad to school.

☐ 1. Set-up your iPad

Ensure you have your iPad stored in a protective case. Our purchasing portals have a range of appropriate cases and accessories.

☐ 2. Read, Sign and Return the BYO Laptop Information and Consent Form

The [BYO iPad Information and Consent Form](#) can be downloaded from the school website. A print copy will be provided during the first week of school.

☐ 3. Settings and Parental Controls

Consider [using parental controls on your child's iPad](#). At school, students will be connected to the school network, which has built in internet filters and monitoring functionality. How your child uses their device at home is not monitored by the school, and we strongly encourage parents/carers use parental controls to ensure your child is eSafe outside of school hours. The [eSafety commissioner Parental Controls](#) page also contains valuable information for parents to maximise online safety in your home.

☐ 4. Download and install Intune Company Portal app, and sign in using student username and password.

Use the [BYO iPad Intune Company Portal how to guide](#) to download the [Intune Company Portal](#) app on your child's iPad. Sign in using your child's student username and password, which will be provided at the beginning of the school year.
