BYO LAPTOP PROGRAM
YEARS 4,5,6

Your Child...Our Student...Their Future

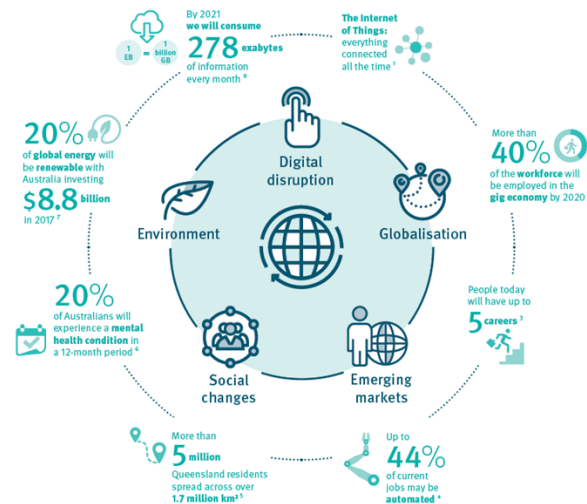

BRING YOUR OWN LAPTOP

BYO Laptop recognises the demand for seamless movement between school, work, home and play. Our BYO Laptop program assists students to improve their learning outcome in a contemporary educational setting. Assisting students to become responsible digital citizens enhances the teaching learning process and achievement of student outcomes, as well as the skills and experiences that will prepare them for their future studies and careers. Moving to laptops opens up new opportunities, which will see our school continue to lead the way in high quality 21st century learning for all students.

The BYO Laptop program will give your child the opportunities to work collaboratively with other students and receive learning feedback from teachers through OneNote or Blackboard eLearn. Students will engage in deeper, real-world learning experiences incorporating coding, robotics, drones and other STEM skills.

OUR WORLD IS CHANGING

The BYO Laptop program is designed to help students keep up with the demands of the 21st century. The rapid pace of change in our world is generating new social, personal and learning demands. We are responding to this change by creating inclusive school communities that nurture wellbeing and build the skills students need for their future. We are helping students become responsible digital citizens.

WHAT ARE THE BENEFITS?

◇ The use of laptops in the classroom will help support the curriculum.

◇ Laptops foster online collaboration with other students.

◇ Submitting work digitally will allow teachers to edit student papers and return them digitally to the students to provide more detailed feedback.

◇ Students' computer skills will improve which is imperative for the future.

◇ Using laptops in the classroom will make learning more interesting.
